

SAMPLE

**R2V3 FACILITY CERTIFICATE**

Sample layout — responsible recycling practices documentation

|                     |                                                                                      |
|---------------------|--------------------------------------------------------------------------------------|
| Organization        | FTD Environmental Tech                                                               |
| Facility            | 14135 Castle Blvd, Silver Spring, Maryland 20904                                     |
| Scope (sample)      | Used electronics and IT asset disposition, data sanitization, and materials recovery |
| Standard referenced | R2v3 (illustrative sample layout)                                                    |
| Document ID         | FTD-R2-SAMPLE-2026                                                                   |
| Issued (sample)     | July 29, 2026                                                                        |

This SAMPLE certificate shows how FTD may present facility-level recycling documentation on the website while formal accreditation packages are prepared. It is provided for client review of document style and content structure only.

**Sample commitments illustrated**

- Serialized tracking of data-bearing equipment through processing
- Downstream due diligence for focus materials
- Worker health, safety, and environmental controls in operations
- Transparent reporting available to customers through the client portal
